Description

Ultrasnap™ swabs are used with the SystemSURE Instrument for the measurement of ATP on surfaces. The Ultrasnap™ is a user friendly, self-contained sampling device that is activated with a simple swab, snap and squeeze action.

Ultrasnap™ unique liquid stable reagent provides better accuracy, longer lasting signal strength and more reproducible results.

Advantages

- User friendly self-contained swab with liquid stable reagent
- Snap-Valve™ technology - snap & squeeze
- Pre-moistened swab bud
- Write-on label
- Test wet or dry surfaces and liquid samples
- Results in 15 seconds

Instructions

Virtual Demonstration

Shelf Life

- 12 months at refrigerated temperature (2-8°C)
- 4 weeks at room temperature (21-25°C)
