### Description

Resin-Set DRS® Brushware boasts a revolutionary improvement in brush filament retention, known as the 'Dual Retention System' (DRS). This unique approach uses both food-grade stainless steel staples and an anti-microbial resin to secure the tufts into the brush back. This is not only prevents the accumulation of dirt and moisture in the tuft areas, but also avoids the release of filaments into the food or beverage manufacturing environment.

- 'Dual Retention System' (Resin-Set DRS®), minimises filament loss.
- Anti-microbial resin inhibits the growth of moulds and bacteria.
- Available in 5 colours to assist with work area segregation and HACCP Compliance.
- Industrial dishwasher safe.
- Working temperature range: -18°C to 79°C.
- All products may be autoclaved in temperatures up to 134°C.
- All components are FDA / EU approved.
- Independent migration tests show all plastic used are well within FDA / EU limits.
